

College Persistence

YES College Prep alumni are on track to significantly outpace their peers in college graduation rates. In the state of Texas, fewer than 60% of public university students earn a bachelor's degree within six years. The numbers for students who receive financial aid are even more alarming – only 48% have earned a bachelor's degree within six years of first enrolling in college. Hispanic students in Texas public colleges and universities fare even worse: six years after first enrolling in college, only 43% have earned a bachelor's degree.* YES students thus far have demonstrated remarkable college persistence and over 75% are on-track to earn an undergraduate degree within six years of first enrolling in college.
